

The world's first **high-performance eco-friendly** golf company™

DIXON

① new ball

② used ball

③ polymer

④ new life

Dixon Golf is an Arizona-based manufacturer of the world's first high performance eco-friendly family of golf balls. The company was founded in 2008 to solve a simple problem: **each year, more than 2 billion golf balls are manufactured for sale, with more than 300 million of them ending up in landfills. Many of these balls contain materials which are harmful to the environment.** Dixon Golf has created a recyclable golf ball using a proprietary polymer core that is not harmful to the environment and is completely recyclable. The Dixon brand supports sustainable golf by offering discounts to golfers who recycle their golf balls.

The best part about Dixon Golf balls is that they have outperformed the leading brands in independent testing. Dixon Golf balls have received outstanding reviews from the likes of *Golf Tips Magazine* and *Golf Digest*. It's easy to see why celebrities, professional golfers and other athletes use Dixon Golf balls as their ball of choice.
